

[Version 0.1] // Build Guide // Initializing...

selfdriven.you Cyberdeck

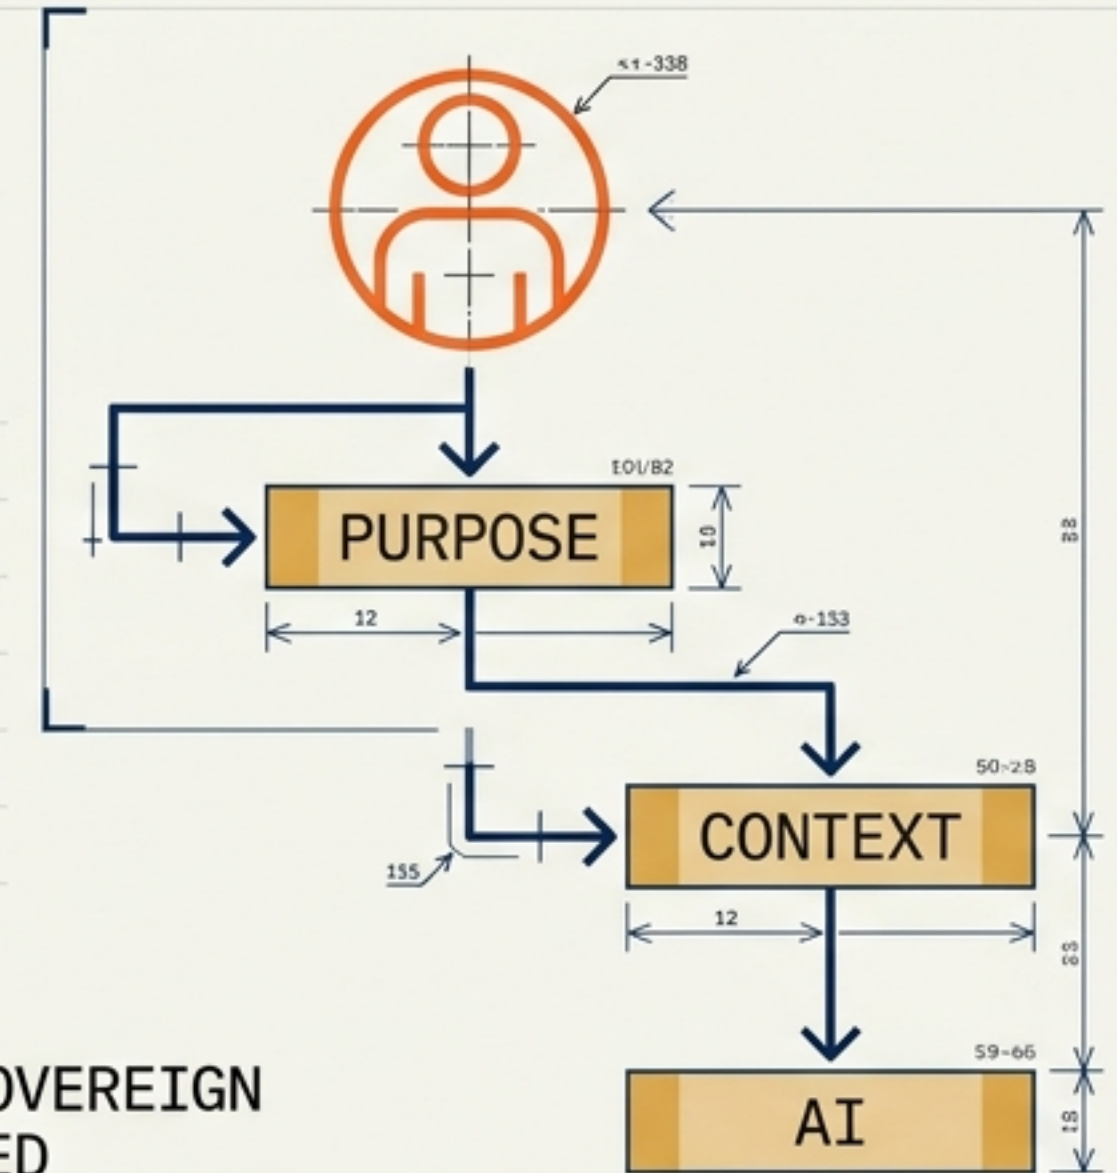

A Personal Sovereign Intelligence Terminal

THE INTELLIGENCE AGE PROBLEM

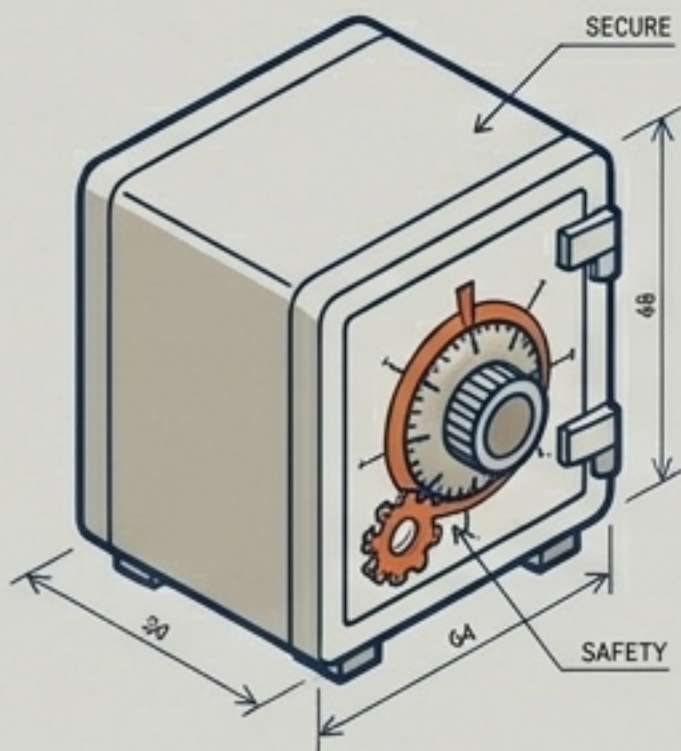

- CENTRALISED
- OPAQUE
- DATA HUNGRY
- ATTENTION EXTRACTING

THE INTENTION PARADIGM

- SELF-SOVEREIGN
- VERIFIED
- LOCALLY CONTROLLED
- INTENTION DRIVEN

THE HUMAN REMAINS THE PRIMARY ACTOR. AI IS A TOOL, NOT A DEPENDENCY.

SELF-SOVEREIGNTY

You exclusively own:
Identity, Credentials, Data,
Keys, Models, and Context.

Zero cloud dependency
required.

+ TECH SPEC: LOCAL_OWNERSHIP_PROTOCOL v1.2
+

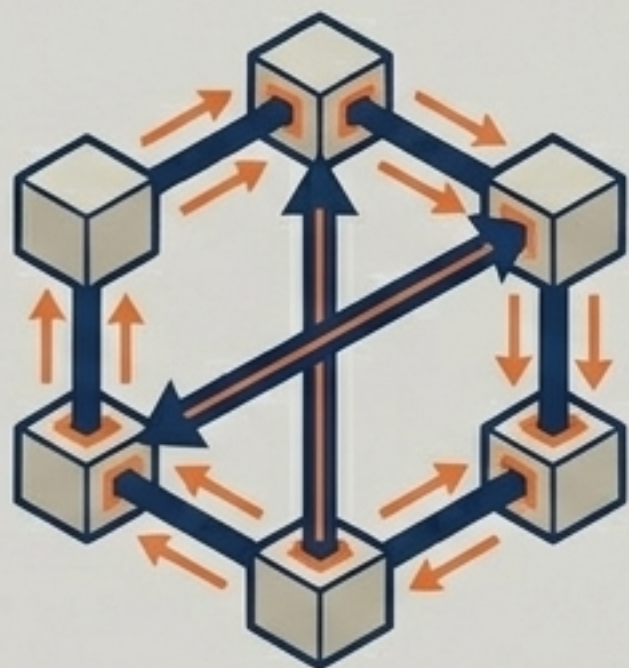

LOCAL FIRST

Total offline functionality.
Note-taking, learning
journals, context graphs,
verifiable credentials, and AI
assistants operate natively.

Internet is strictly optional.

+ TECH SPEC: OFFLINE_MODE_NATIVE_OS
+

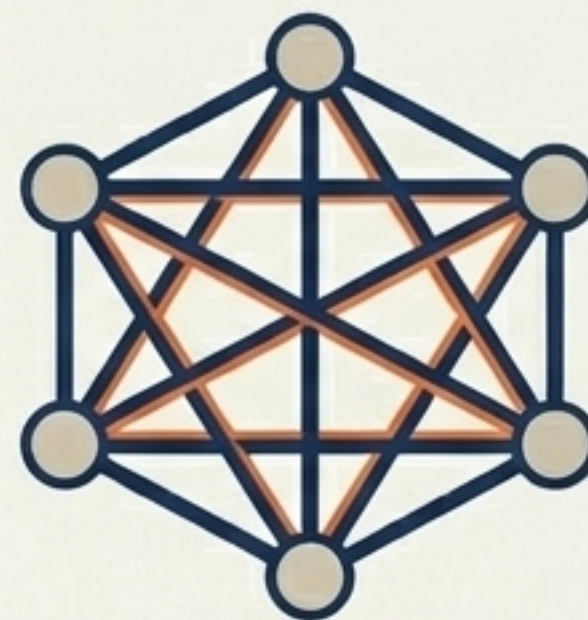

VERIFIED CONTEXT

Raw AI tokens have little
long-term value; verified
context compounds.

The deck actively collects
facts, evidence, credentials,
experiences, and relationships.

+ TECH SPEC: CONTEXT_VERIFICATION_ENGINE_R4
+

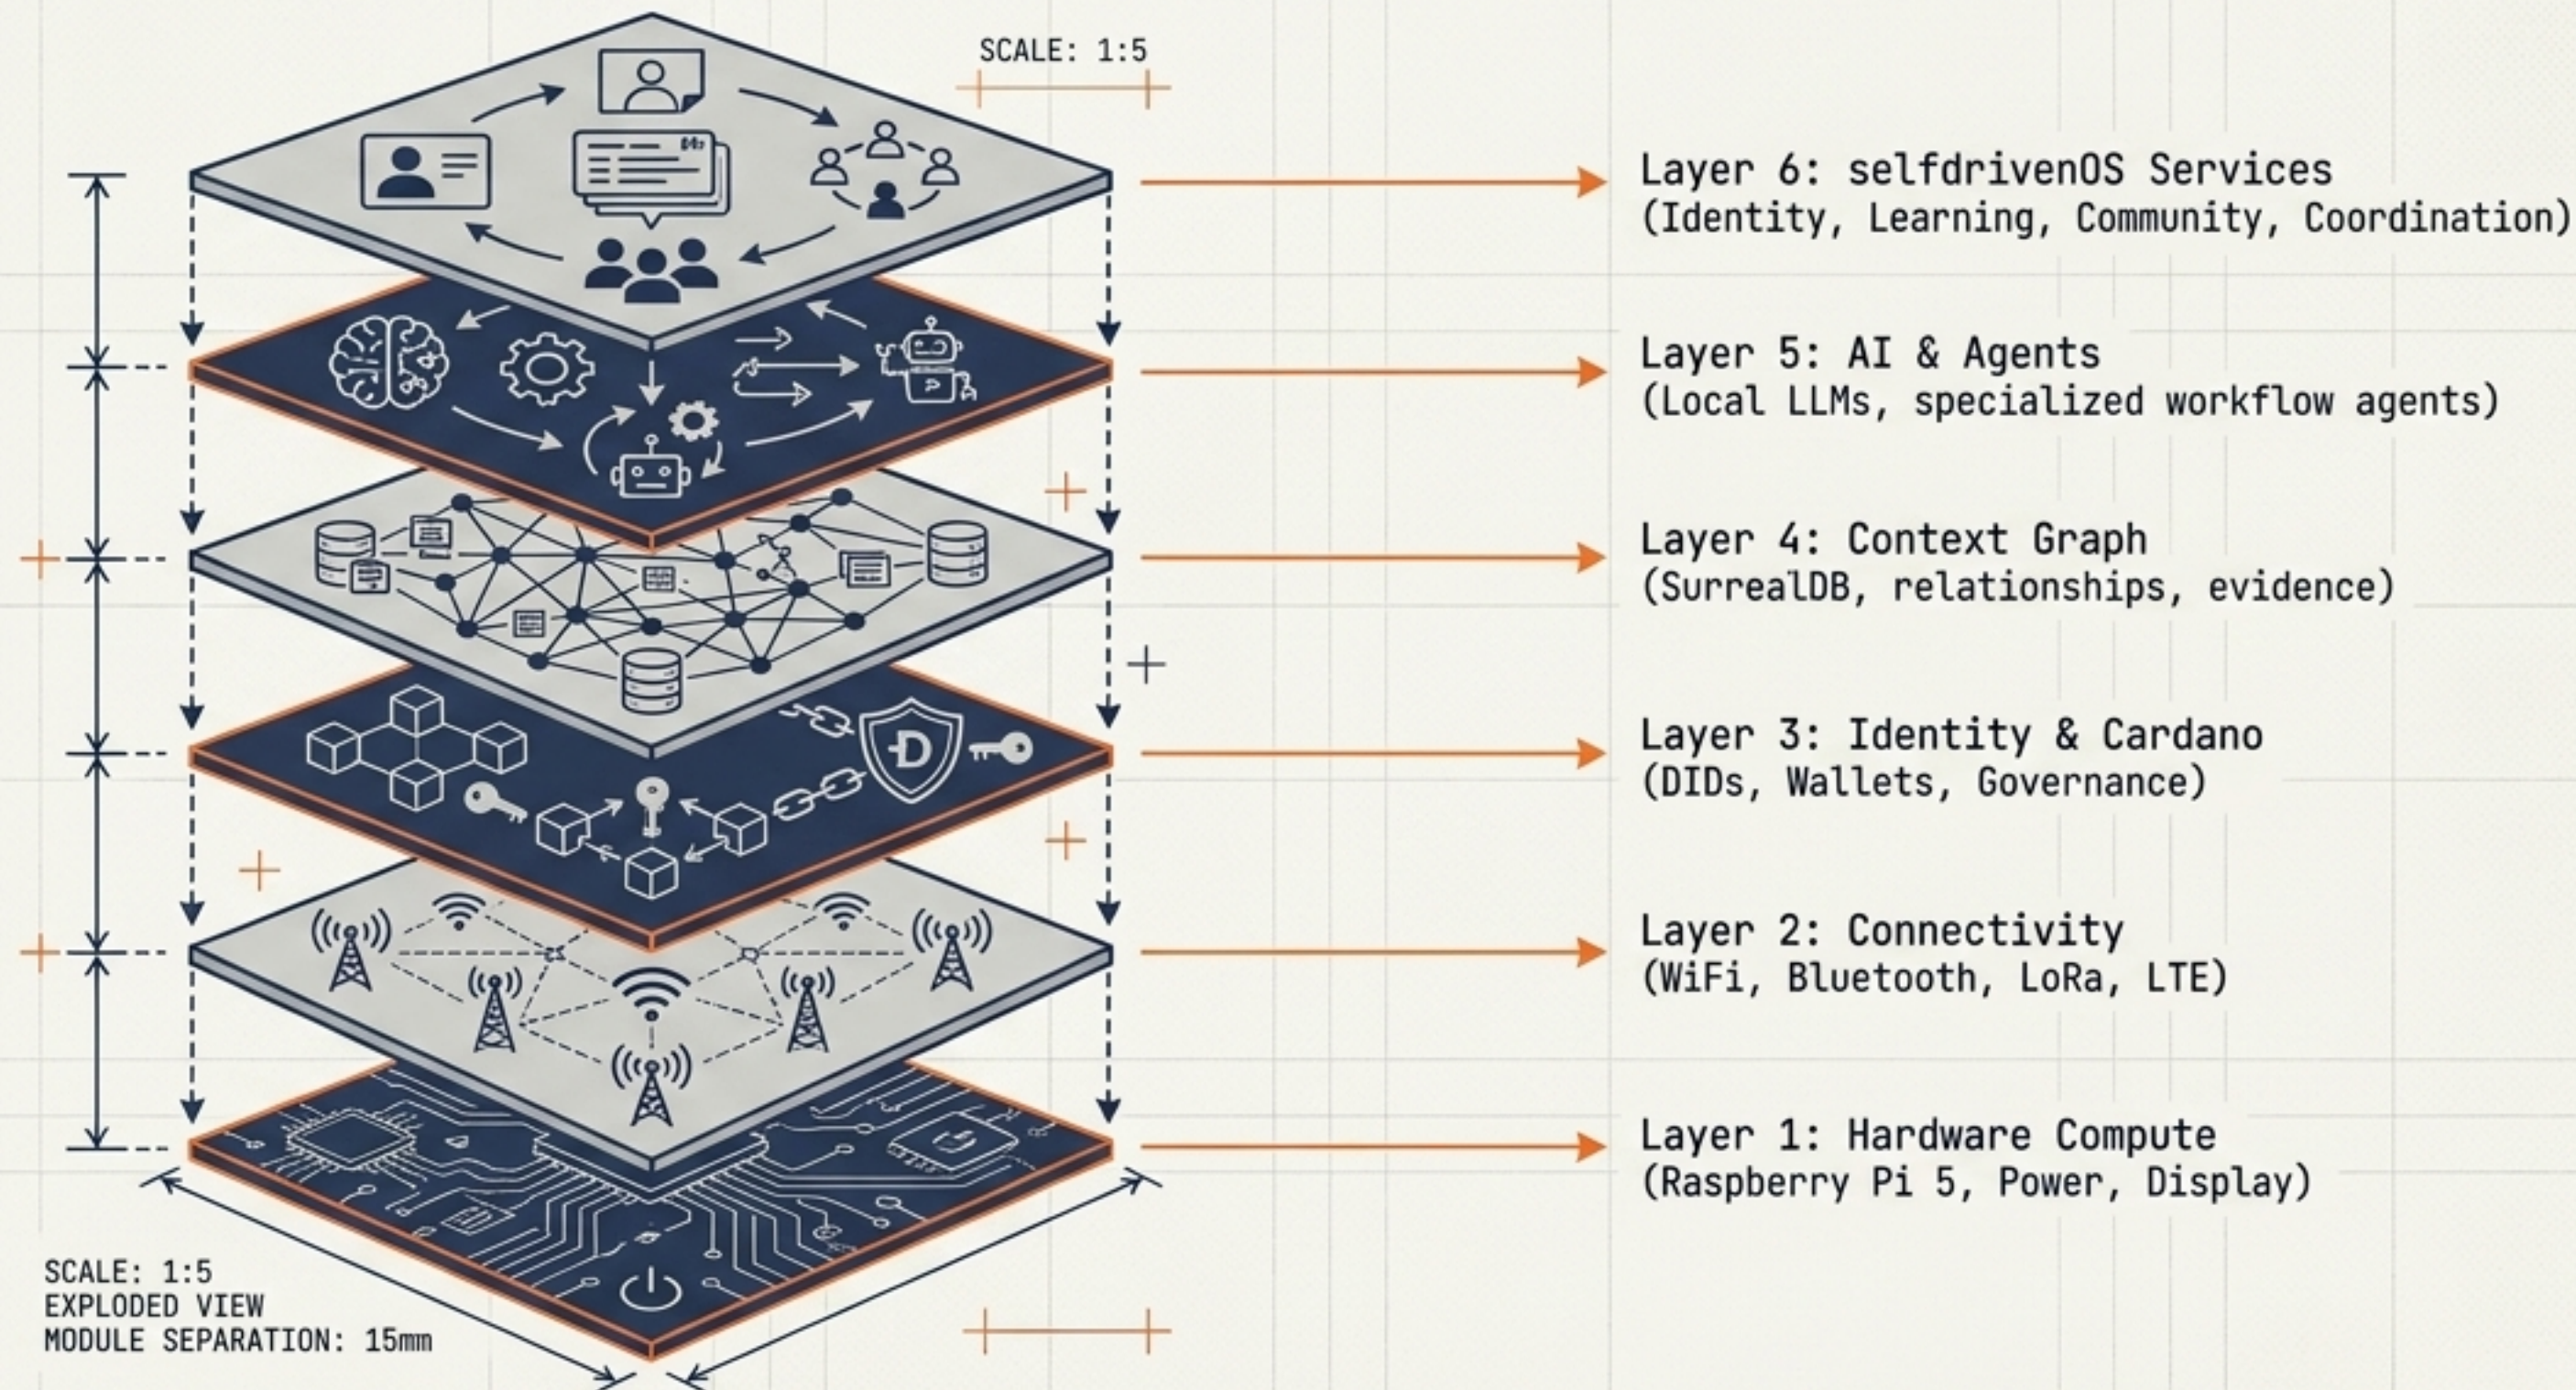

COMMUNITY FIRST

Designed to seamlessly
interface with learning
groups, local communities,
DAOs, Cooperatives, and
Governance systems.

+ TECH SPEC: P2P_MESH_INTERFACE_STANDARD
+

SYSTEM ARCHITECTURE: SELFDRIVENOS BLUEPRINT

TECH SPEC: MODULAR_LAYERED_STACK_V1.4

CYBERDECK BUILD GUIDE: HARDWARE SCHEMATIC

TECH SPEC: PHYSICAL_BUILD_GUIDE_v1.2

TECH SPEC: COMPUTE_ENGINE

COMPUTE ENGINE:
Raspberry Pi 5 • 8GB RAM
• NVMe HAT • 1TB SSD.

NOTE: Local LLMs require high SSD bandwidth.

TECH SPEC: INPUT_SYSTEM

INPUT: Mechanical layout.
Keychron K3, Logitech K380,
or Custom Build.

TECH SPEC: ENCLOSURE

ENCLOSURE: Ruggedized. Pelican case, 3D printed, Aluminum field case, or Military surplus.

TECH SPEC: VISUAL_INTERFACE

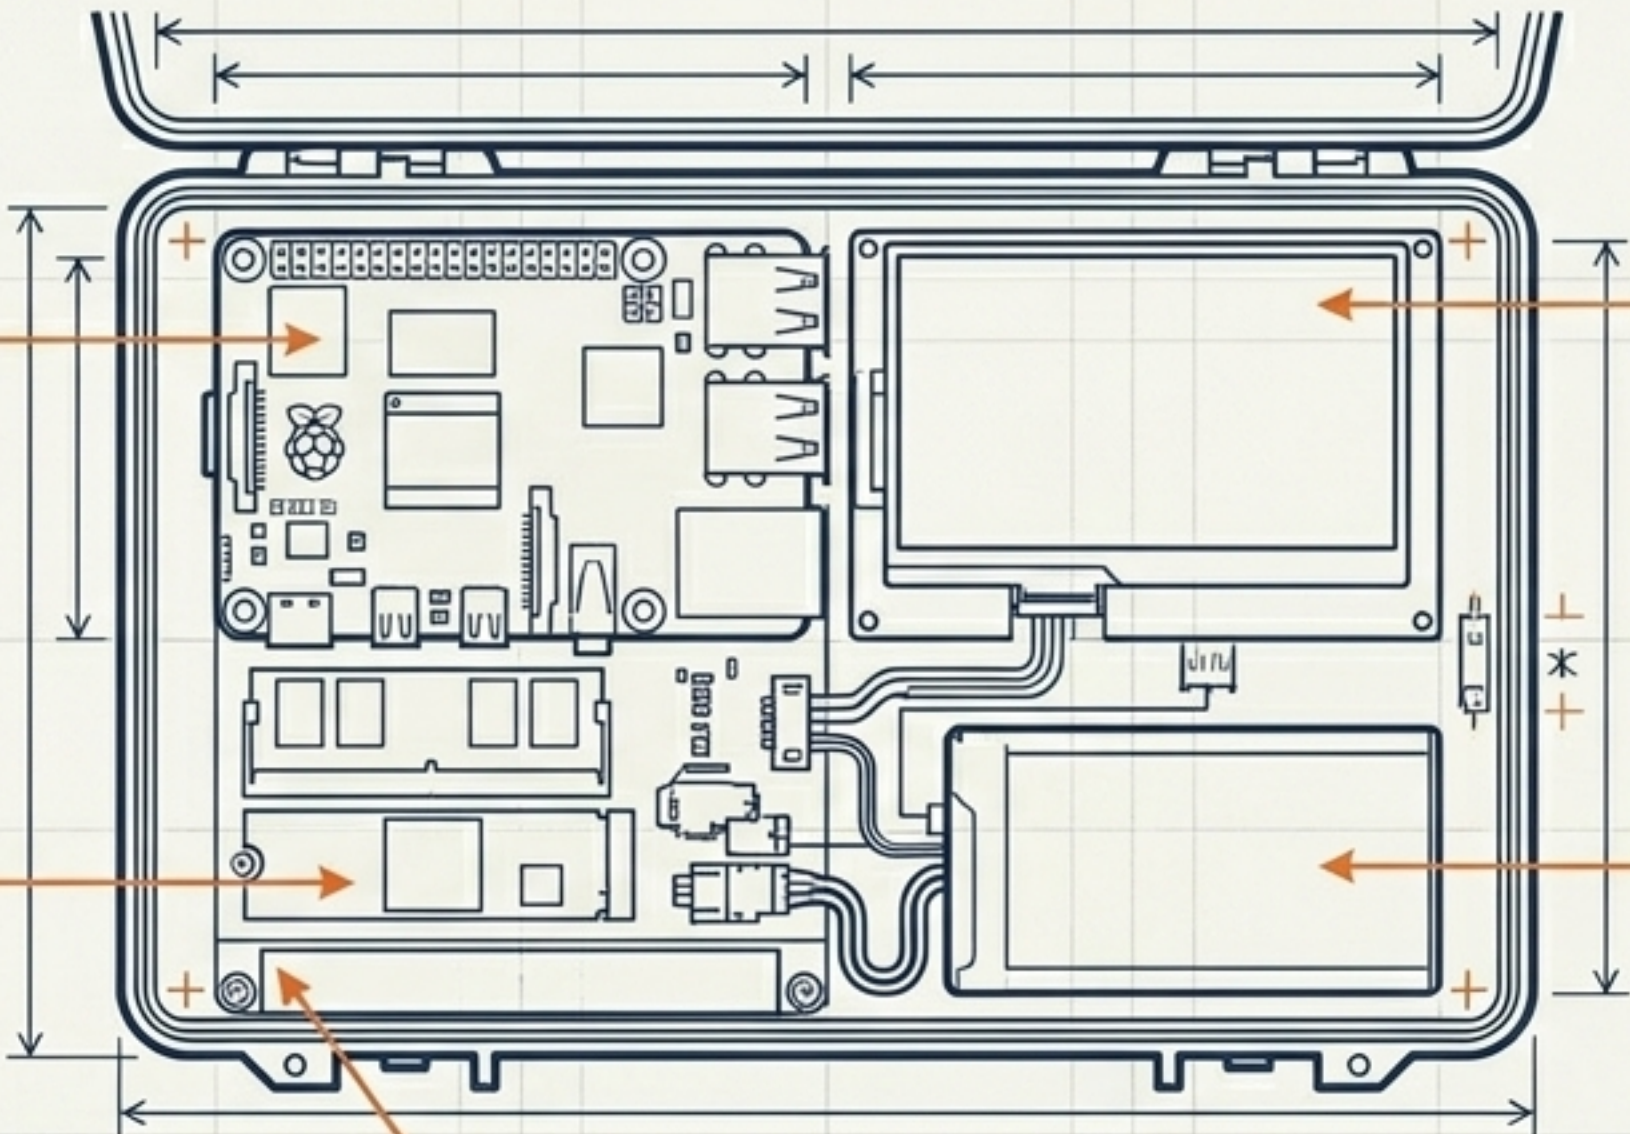

VISUAL INTERFACE:
7 inch HDMI Touchscreen
OR 10 inch IPS Display.

RECOMMENDED RESOLUTION:
1280x800 or 1920x1200.

TECH SPEC: POWER_SUPPLY

POWER SUPPLY:
USB-C Power Bank.

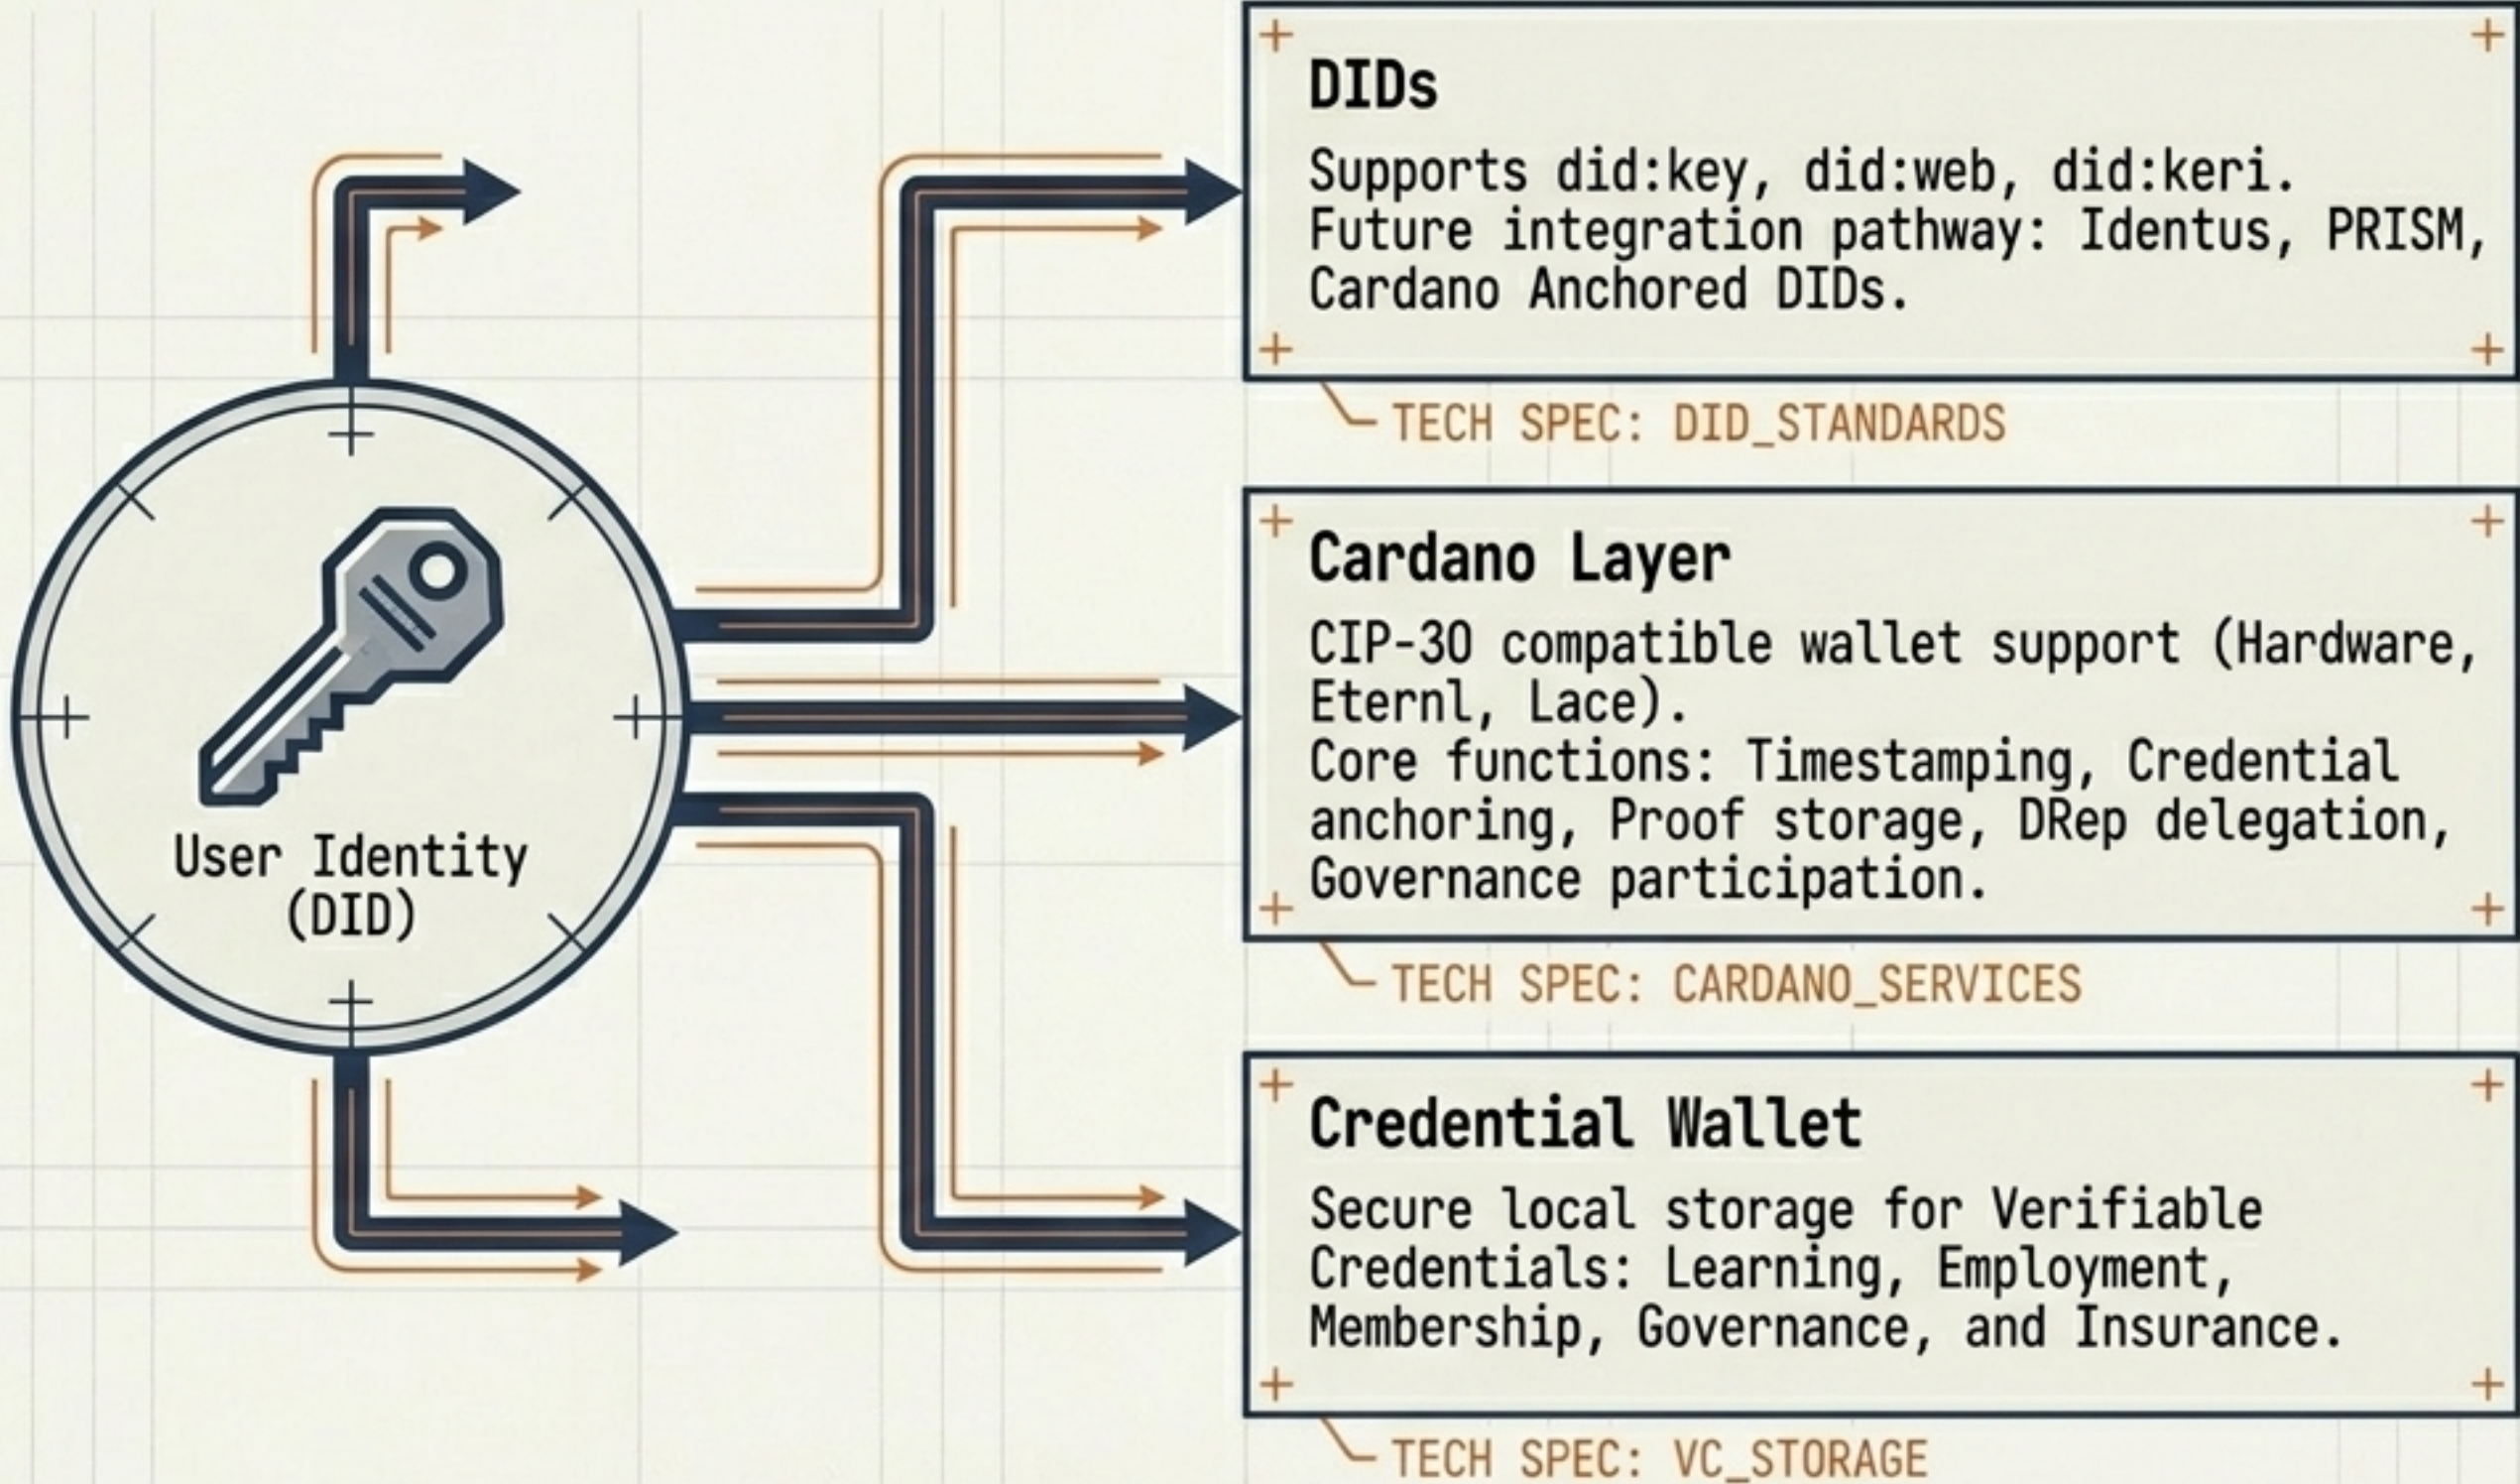

MIN: 20k mAh.
PREFERRED: 30k mAh.
TARGET RUNTIME: 8-12 hours.

0 25 50 2000

CRYPTOGRAPHIC ECOSYSTEM: HUB-AND-SPOKE SCHEMATIC

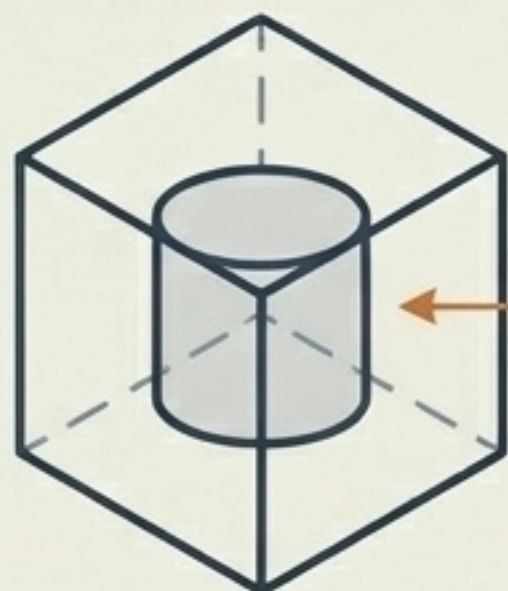

TECH SPEC: CRYPTO_ECOSYSTEM_DIAGRAM_v2.1

THE VERIFIED CONTEXT GRAPH LAYER

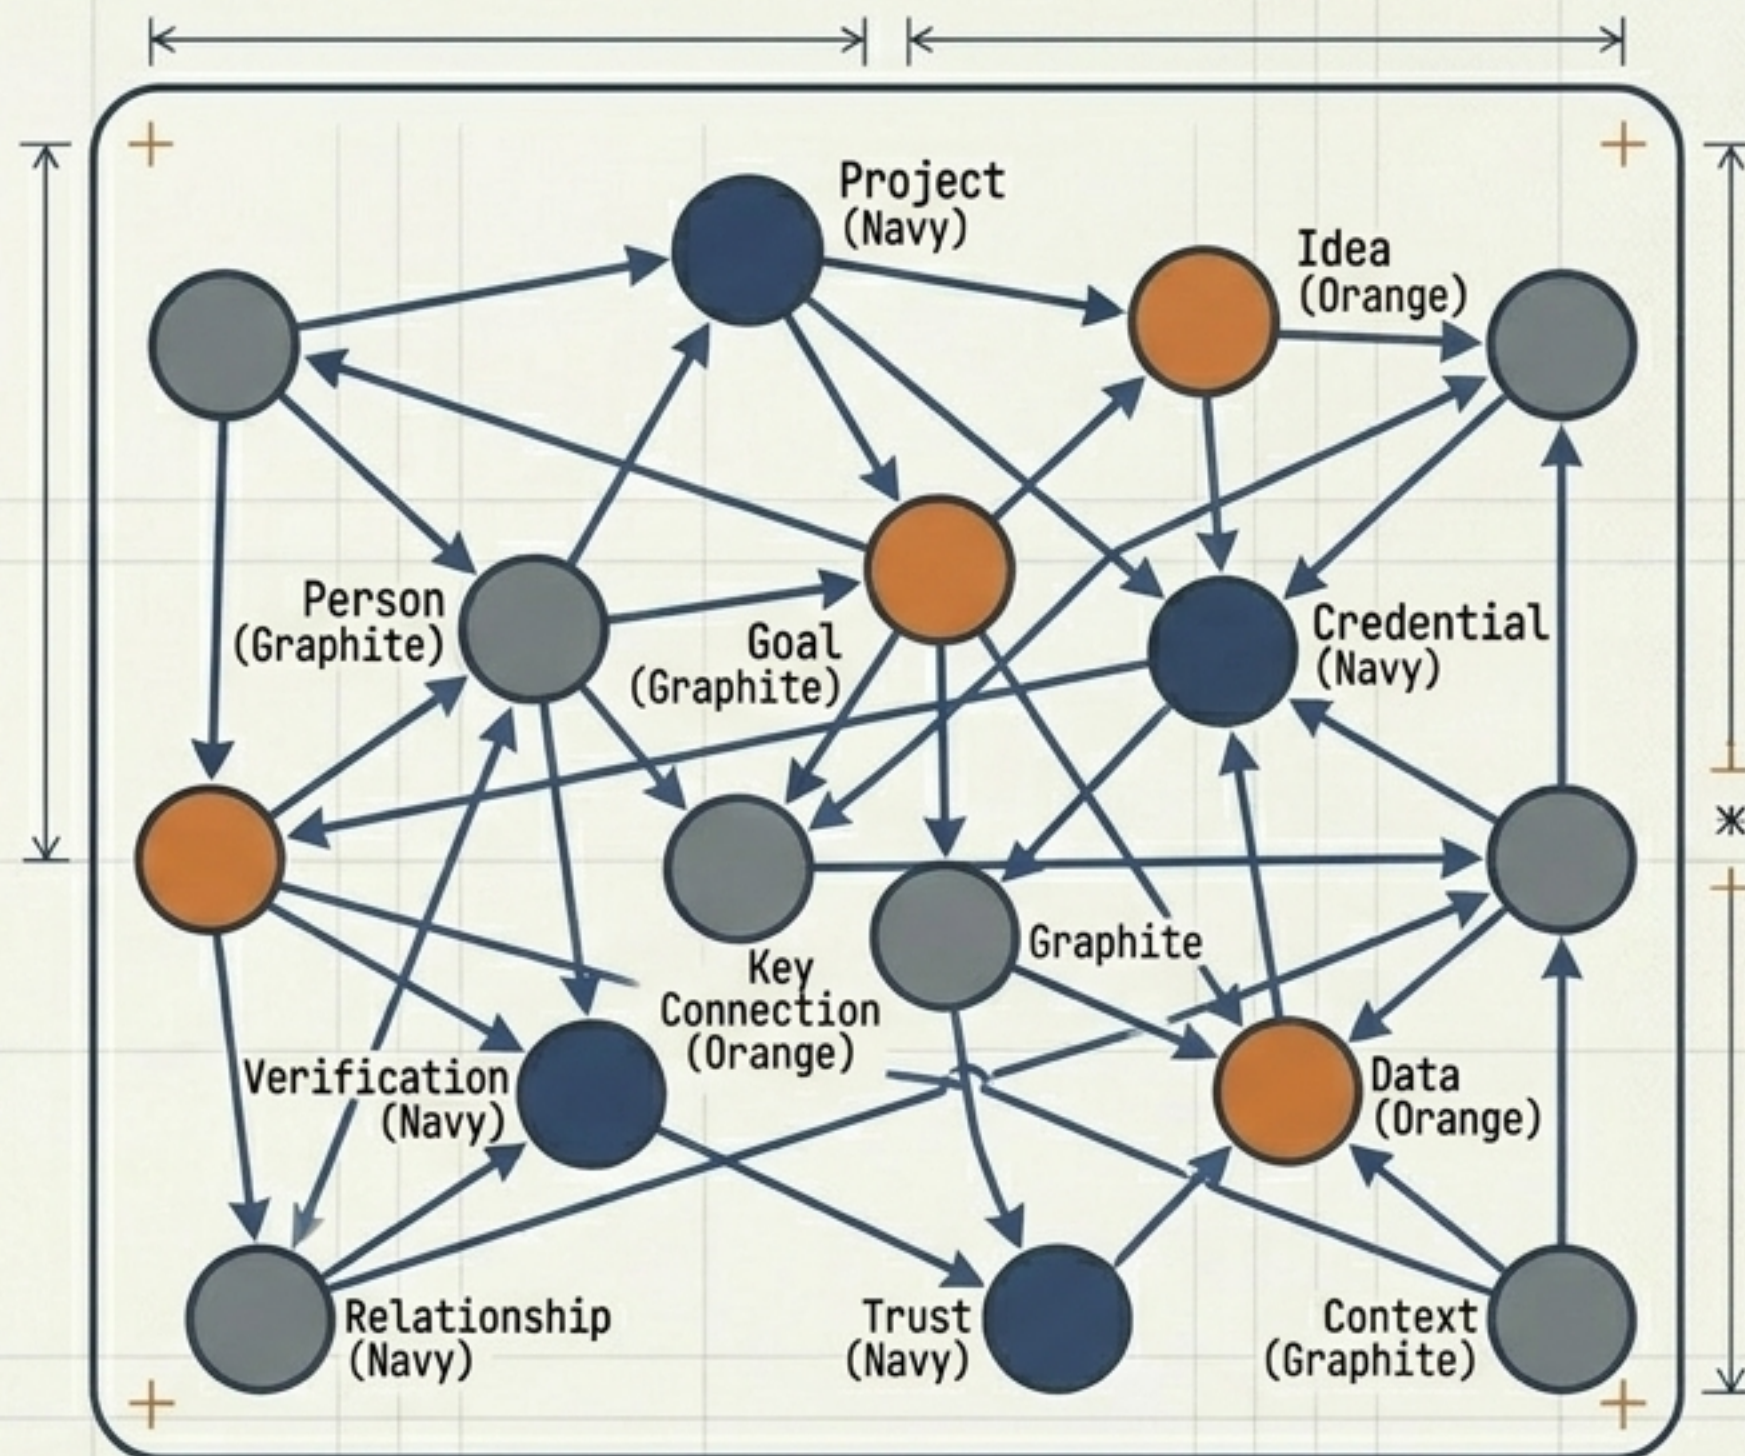

Raw tokens don't compound.
Relationships do.

The graph locally maps: People,
Projects, Ideas, Goals, Credentials,
Evidence, Actions, and Relationships.

Evaluated local graph
databases:
Neo4j, ArangoDB.

Recommended
Architecture:
SurrealDB (Optimized
for simple, robust
deployment on
Raspberry Pi).

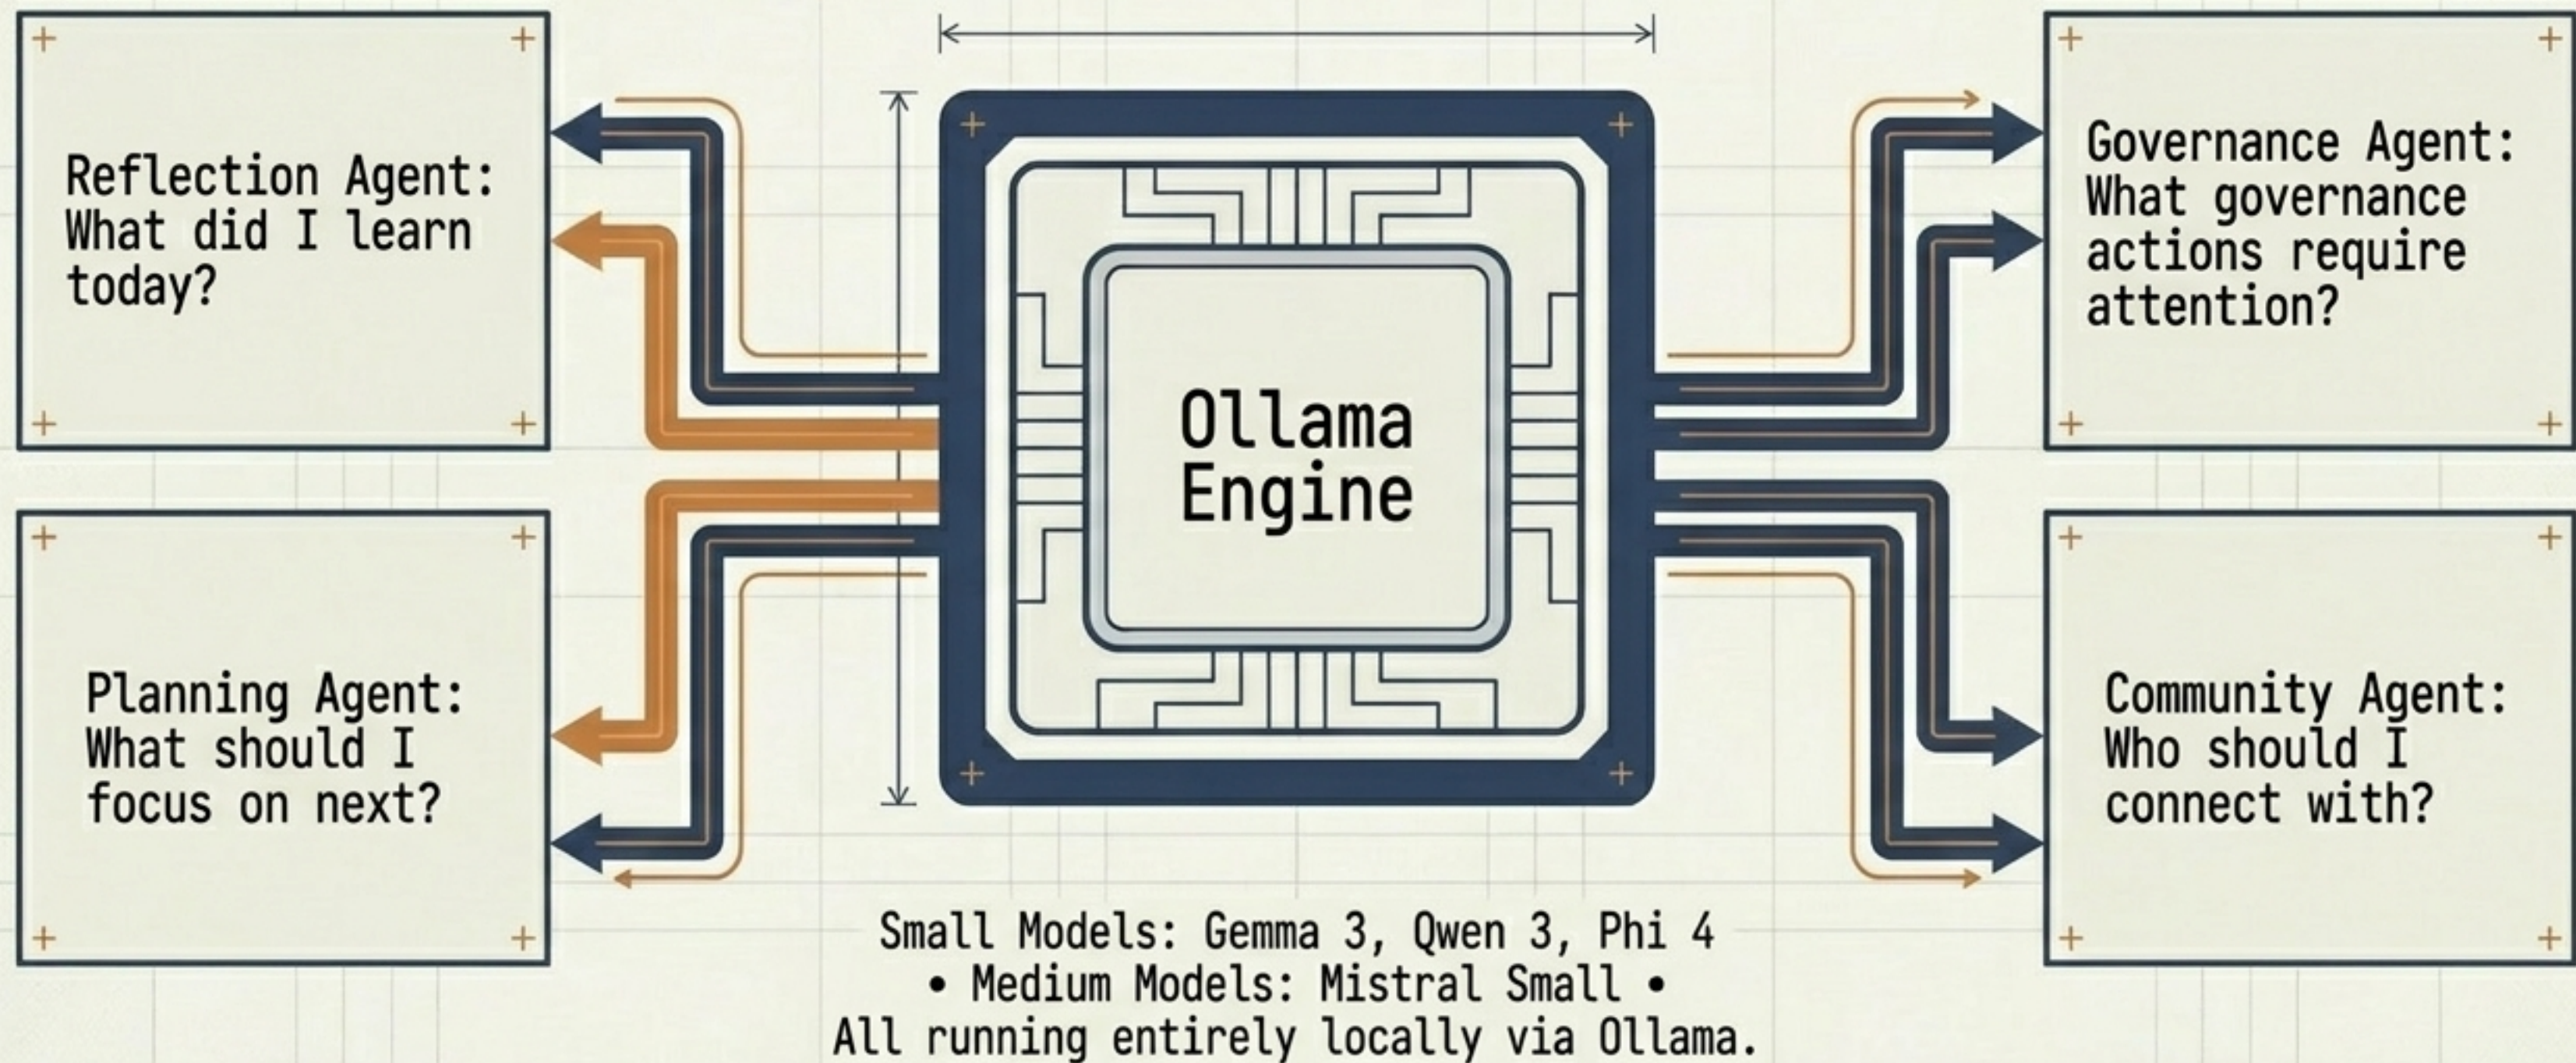

TECH SPEC: GRAPH_RELATIONSHIPS_v3.1

0 25 50 2018

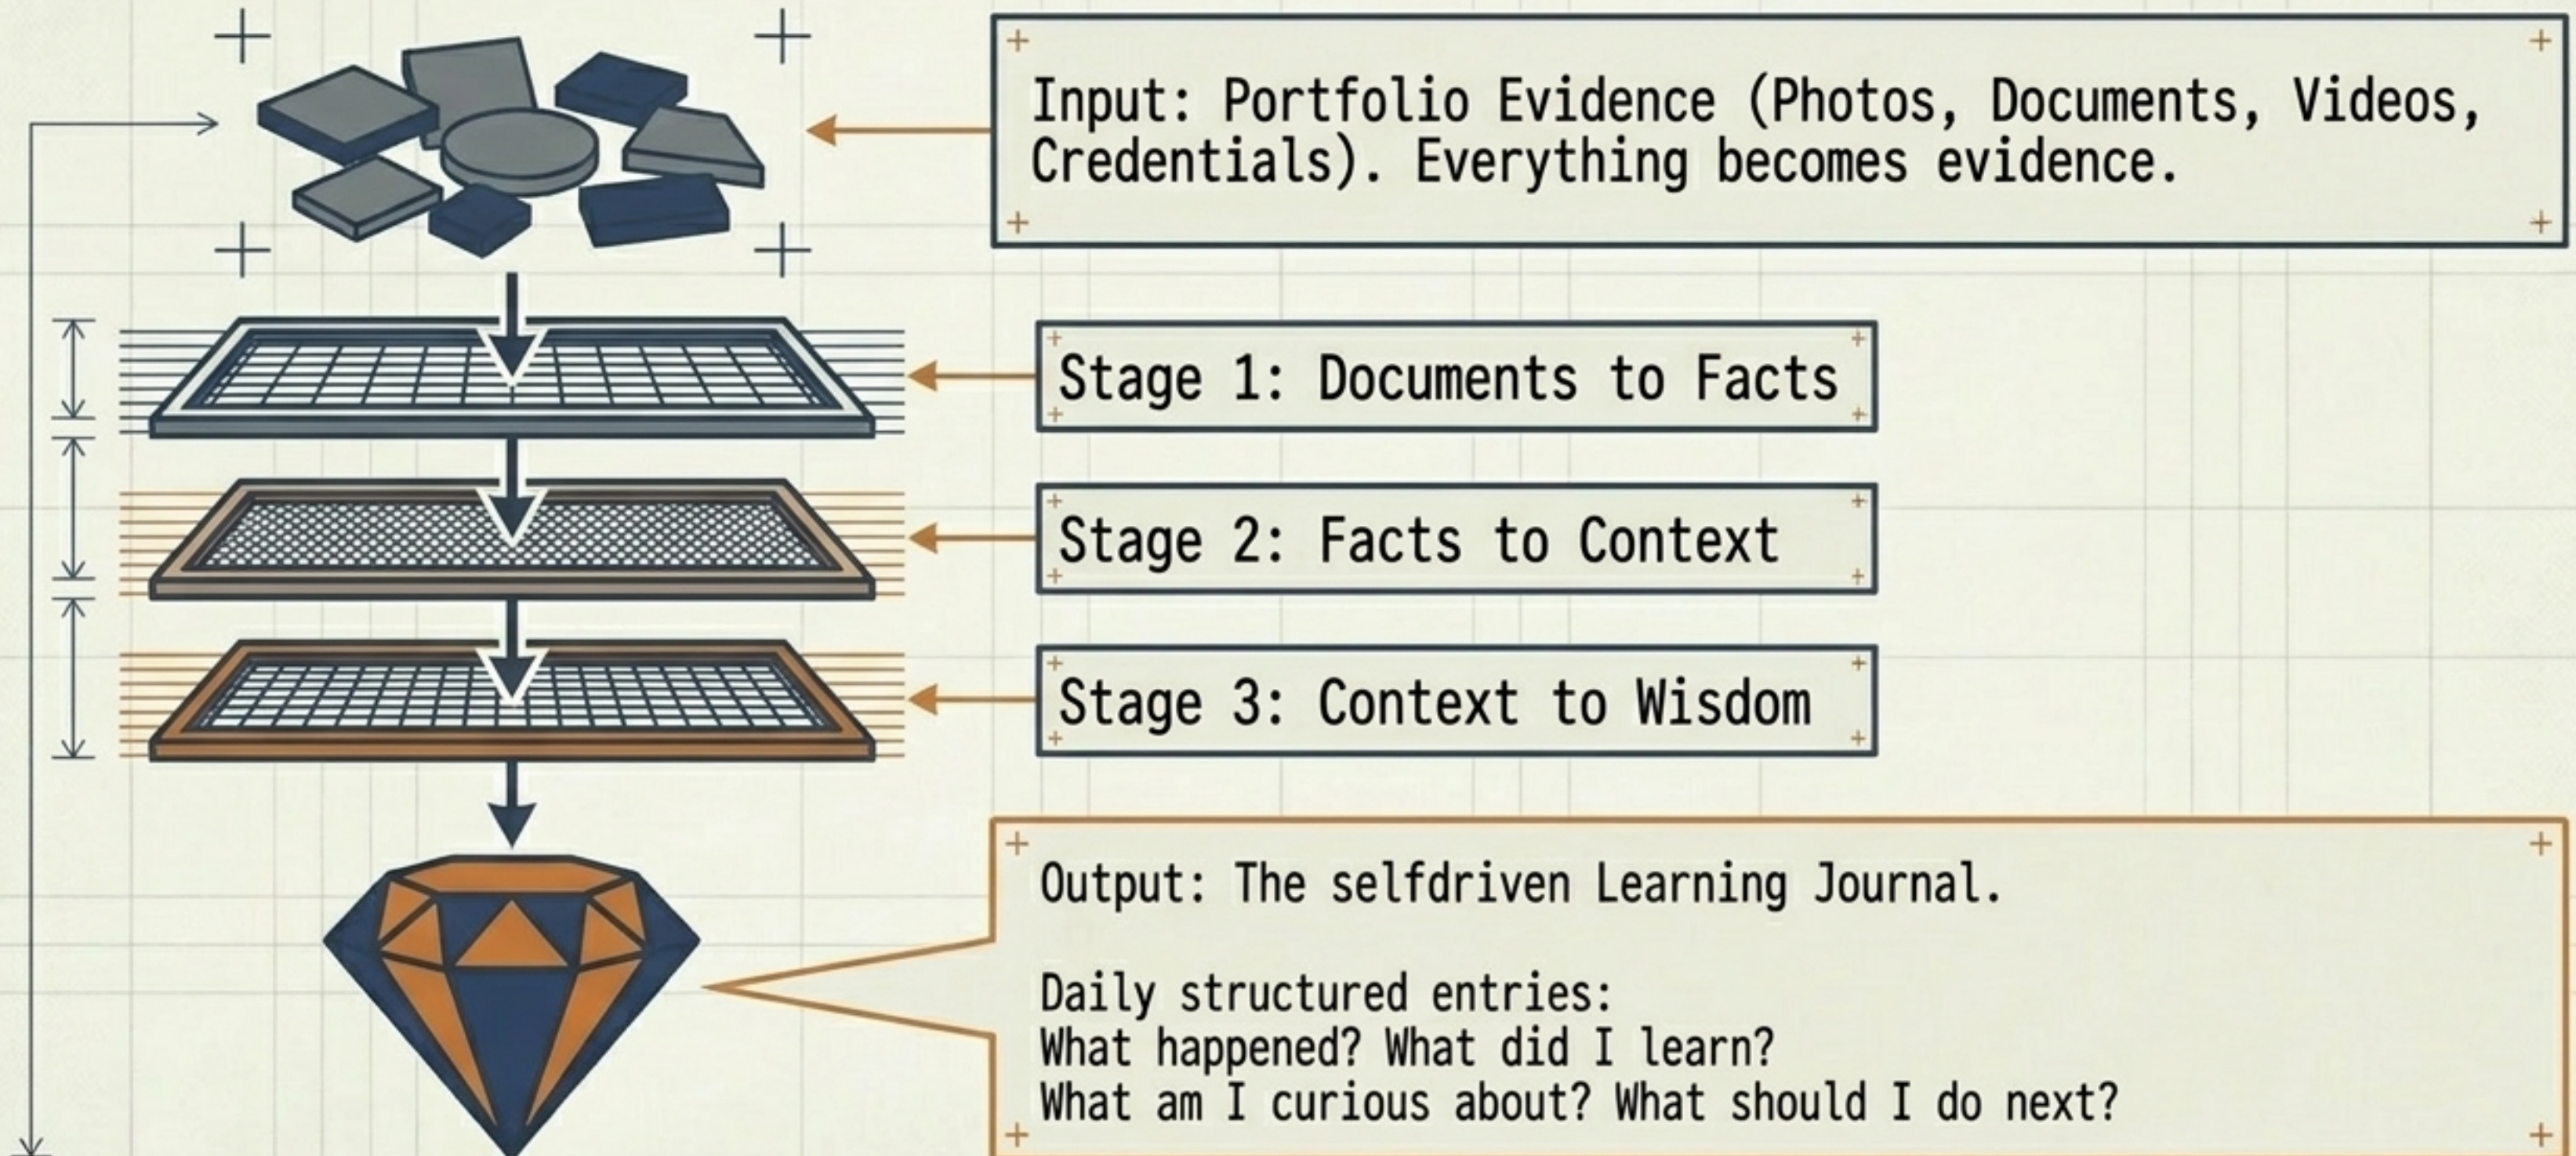

DIGITAL CONTROL CENTER: ROUTING DIAGRAM

TECH SPEC: OLLAMA_ENGINE_DIAGRAM_v1.0

LEARNING PROCESS REFINEMENT SCHEMATIC: EVIDENCE TO WISDOM

TECH SPEC: OLLAMA_ENGINE_DIAGRAM_v1.0

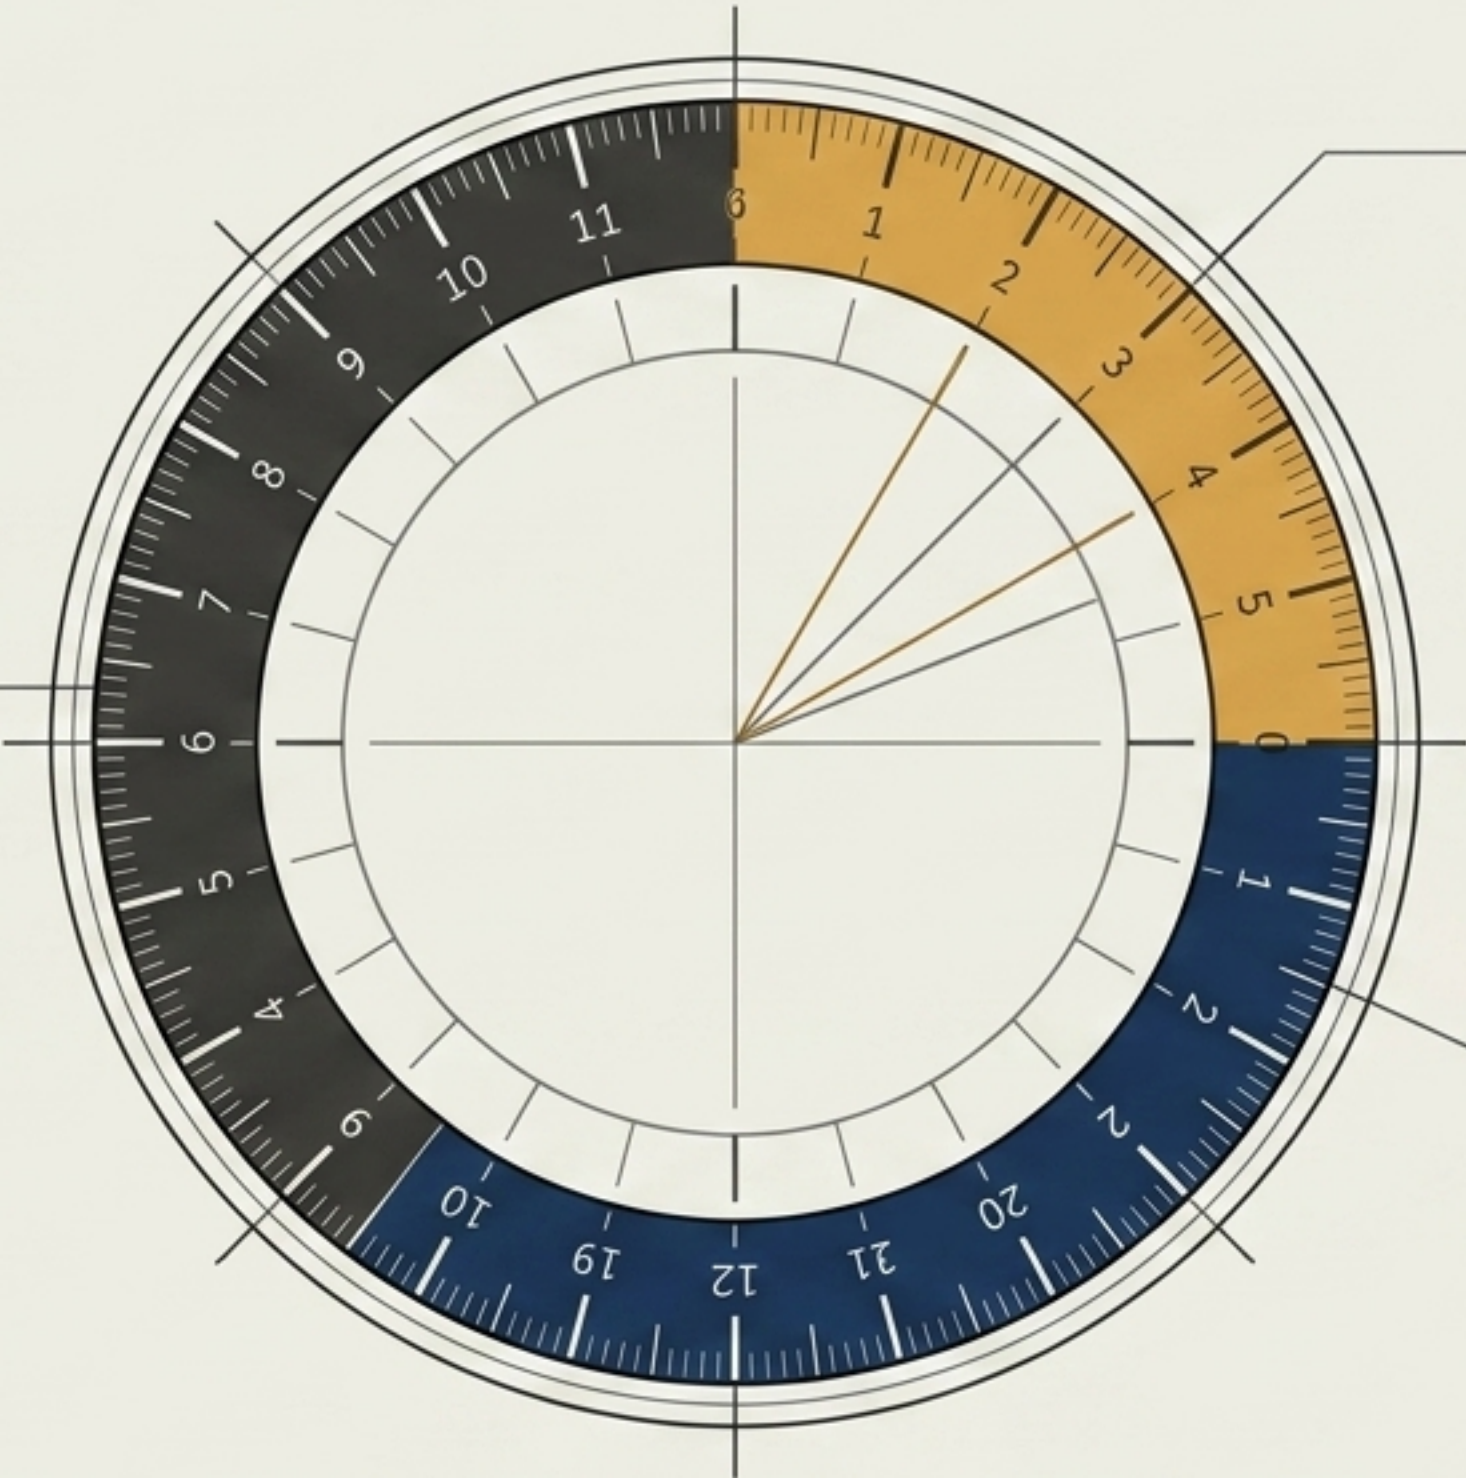

DAILY OPERATIONS SCHEDULE: TEMPORAL FLOW

TECH SPEC: OLLAMA_ENGINE_DIAGRAM_v1.0

Evening (Synthesis)

Reflect -> Journal ->
Generate insights -> Plan
tomorrow.

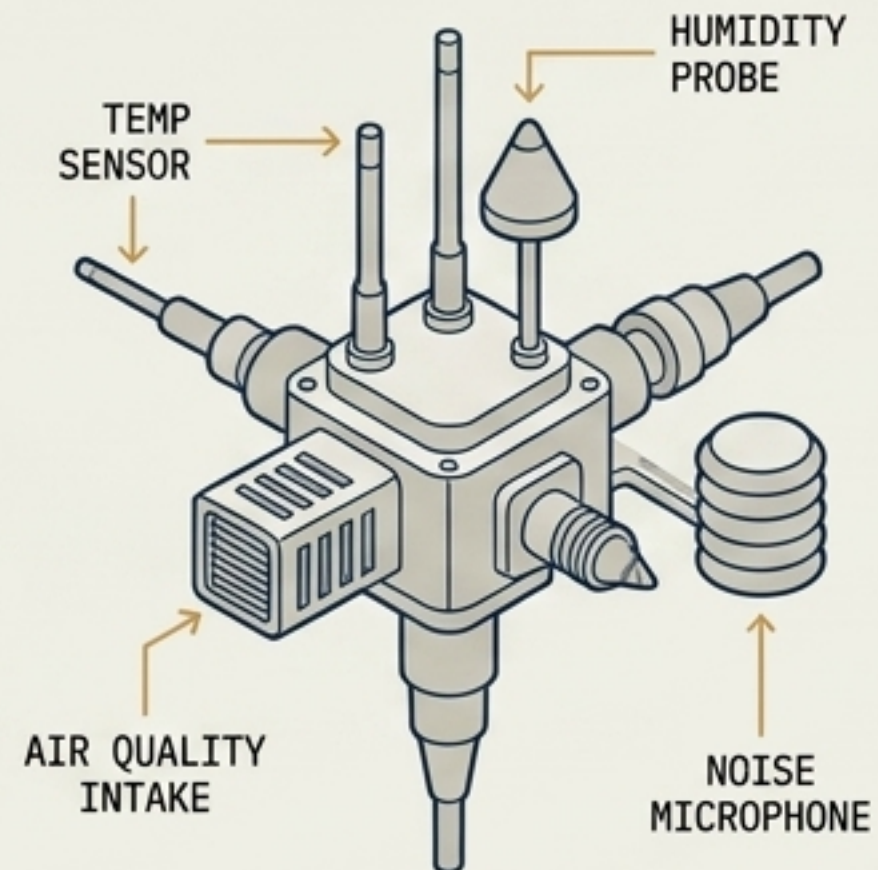

Morning (Boot Sequence)

Open Cyberdeck -> Review
goals -> Check community
updates -> Ask planning
agent.

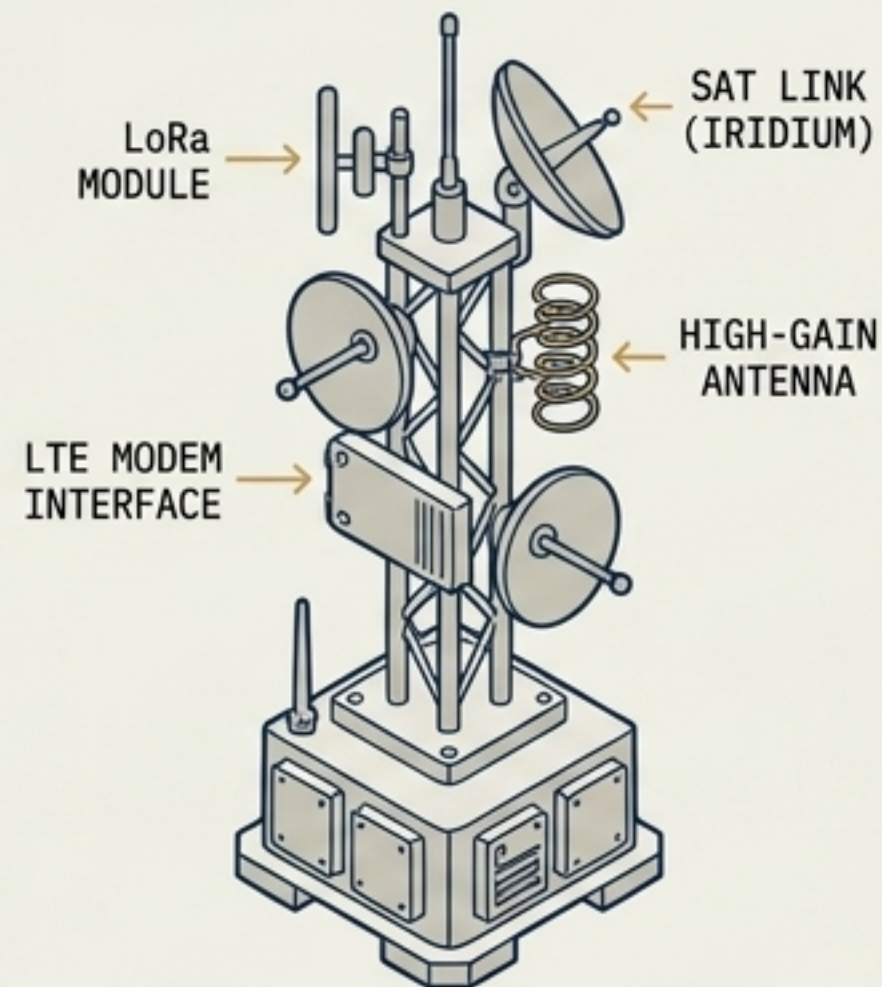

During Day (Active Capture)

Capture notes -> Scan
credentials -> Record
evidence -> Build context
graph.

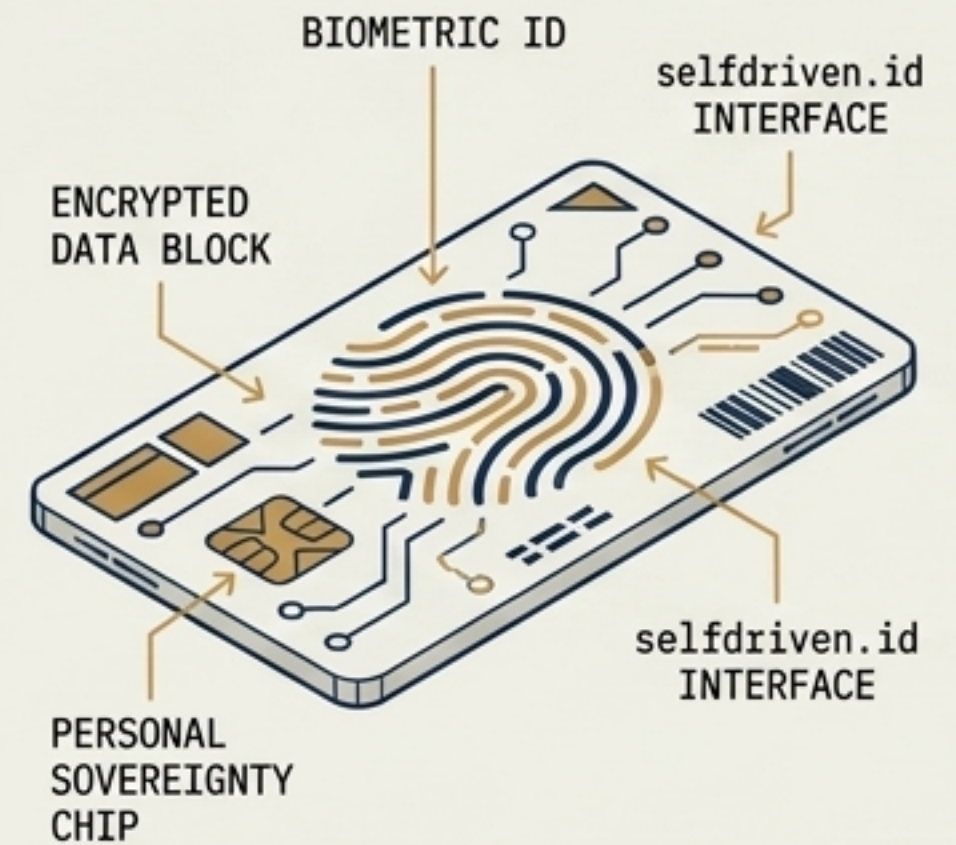

Expansion 1: Environmental & Community Sensing

Hardware add-ons for Air Quality, Temperature, Humidity, and Noise. Local community observations feed directly into Verified Context Graphs.

Expansion 2: Advanced Connectivity

Optional field operations capability beyond standard WiFi/Bluetooth. Integration with LoRa networks, LTE Modems, and Satellite Messaging.

Expansion 3: selfdrivenOS Services

Scaling personal sovereignty outward: selfdriven.id (Identity), selfdriven.school (Learning), selfdriven.foundation (Community), entityOS (Coordination).

The smartphone became the device of the attention economy. The selfdriven.you Cyberdeck is the device of the intention economy.

A personal operating system for human flourishing in the Intelligence Age.
Its purpose is not to maximize engagement—its purpose is to help a person become more self-driven.

// BE CURIOUS. BE CARING. BE CONSTRUCTIVE. BE SELF-DRIVEN.
